

YE WINT AUNG

Full-Stack Web & Frontend Mobile Application Developer

Yangon, Myanmar | +95 9426661125 | yewintaung0401@gmail.com | [linkedin.com/in/ye-wint-aung-a54633301](https://www.linkedin.com/in/ye-wint-aung-a54633301)

PROFESSIONAL SUMMARY

Versatile Software Developer with over 3 years of hands-on experience at Myanmar Information Technology (MIT). Dual-specialized in building responsive full-stack enterprise web platforms (Angular, Spring Boot) and high-performance cross-platform mobile applications (Flutter). Proven track record delivering scalable medical management systems, real-time POS portals, and patient-centric iOS/Android apps published on the App Store and Google Play. A proactive team player with strong engineering fundamentals, adept at agile problem-solving, rapid tech adoption, and production performance optimization.

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Android (Kotlin), iOS Deployment, GetX State Management
- **Frontend & Web:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap
- **Backend & Database:** Java Spring Boot, RESTful APIs, PHP, SQL, SQL Server
- **Tools & Platforms:** GitLab, GitHub, JasperReports, Google Play Store & Apple App Store Publishing

PROFESSIONAL EXPERIENCE

Myanmar Information Technology Pte Ltd (MIT) — Yangon, Myanmar

Frontend Mobile Application Developer & Full-Stack Web Developer | 07/2023 – Present (Mobile: 11/2024 – Present)

- Architected and deployed cross-platform mobile healthcare applications (Asia Royal & Hantha Care) using Flutter and Dart, serving thousands of active patients across Android and iOS.
- Engineered patient registration, real-time doctor availability search, appointment booking workflows, and booking tracking mechanisms utilizing GetX for clean state management.
- Integrated robust REST APIs with Spring Boot backends, ensuring sub-second response times and secure multi-language support (English & Myanmar).
- Constructed full-stack enterprise portals (iThis, iOPD) featuring registration, doctor scheduling, electronic medical records (EMR), room reservation/transfers, and dynamic JasperReports.
- Developed merchant inventory and POS management systems with Angular and Spring Boot, establishing real-time stock updating and administrative dashboards.
- Enforced rigorous code reviews, automated unit testing, code refactoring, and performance tuning across agile sprint cycles.

KEY PROJECTS

- **Asia Royal Healthcare Mobile App** [Flutter, Dart, REST API, GetX, Play Console, Apple Developer]
Published mobile app live on Apple App Store & Google Play Store. Enables direct patient registration, doctor schedule checks, multi-language UI, and instant appointment booking.
- **Hantha Care Mobile App** [Flutter, Dart, REST API, GetX, Play Console, Apple Developer]
Pre-release mobile solution currently deployed on Apple TestFlight and Google Play Internal Testing for patient workflow management and interactive diagnostic feedback.
- **iThis Hospital Management System** [Angular, Java Spring Boot, JasperReports, SQL Server]
Comprehensive clinical portal managing end-to-end hospital workflows, patient registration, room reservations, room transfers, and complex PDF report generation.
- **E-Commerce POS Management Portal** [Angular, Spring Boot, REST APIs]
Commercial merchant platform facilitating real-time stock tracking, category setups, client databases, and automated sales order management.

EDUCATION

- **BSc (Hons) in Computing and Information Systems (Level-5)** — University of Greenwich (KMD College, Yangon) (03/2024 – Present)
- **BSc in Business Management (Third Year)** — Yangon University of Economics (05/2022 – Present)
